DETAILED ACTION

1. Information Disclosure Statement filed on 10/30/01 has been received.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 14 discloses that the snubbing plate limits spring compression..It is unclear to the examiner how the plate performs this function. The plate contacts the spring portion and compresses it against the mounting portion 42 of the casing.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number: 10/020,356
Art Unit: 3683

5. Claims 1-3, 8-13, and 15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Thorn (U. S. Patent no. 4,957,279).
See figure 6 damping layer 219b, spring portion 219a, intermediate stiffening portion 219, web portion 219c, casing 215, damping means 225, collar with first 222 and second 223 halves, bolt 246, inner member 211, cavities unnumbered but on either side of inner member 211
Regarding claims 2 and 3, see column 6 lines 61-67
Regarding claim 17 see column 7 lines 14-51

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims are rejected under 35 U.S.C. 103(a) as being unpatentable over Thorn in view of Majumdar et al (U. S. Patent no. 5,503,940).
Thorn is relied upon as above. Thorn does not disclose a natural rubber cured by sulfur reinforced by carbon black and has octadecanoic acid as a lubricant. Majumdar et al teaches a natural rubber cured by sulfur reinforced by carbon black and has octadecanoic acid as a lubricant (see table 1). It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the rubber as taught by Majumdar et al in the mount of Thorn as material selection is merely a design choice.

Art Unit: 3683

The use of carbon black is well known as a filler and reinforcing material. The use of sulfur as a curing agent is well known. The use of internal lubrication is also well known.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert A Siconolfi whose telephone number is (703) 305-0580. The examiner can normally be reached on M-F 9 am-3 pm.
